

Support Our Mission

The Biodiversity Hub has been awarded significant grants from the Cambridge City Council, the Cambridgeshire Community Foundation and the John Templeton Foundation (through their ECLAS program).

We are now seeking further funding from these and other sources to put our efforts on a more sustainable basis. Plans for this are underway, through more extensive networking and internet-led fundraising.

In the meantime, on a personal basis, if you support our biodiversity objectives, visit us at St Clement's and see for yourself what we have achieved. There are many opportunities for personal involvement, details of which can be obtained from David Bailey.

Our longer-term aims are to extend our local educational platform beyond Cambridge towards more internationally-focused Climate and Biodiversity initiatives, thereby addressing some of the most important global challenges of our time - the Church doing its part in Saving the Planet.
